

45° Butt-Weld Elbow Auto-Weld

- Sanitary Auto-Weld Polished 45° Elbows
- Available in 316L Stainless Steel

45° auto-weld elbow copies BPE design in standard 316 Stainless Steel. Connect separate tubes at a 90-Degree angle with additional room for orbital welding.

Butt weld 45° elbows are available in 316L stainless steel alloy. The product is manufactured in accordance with 3A Standards for sanitary-grade line process equipment in both the food and beverage industries. Outside diameter is available from 1" – 4". Butt welding creates a permanent connection which cannot be easily cleaned in place. Tangents allow for additional room to accomplish welding in place.

A	R	Wall
1"	316L	2.250
1-1/2"	316L	2.500
2"	316L	3.000
2-1/2"	316L	3.000
3"	316L	3.688
4"	316L	4.813
