

## Polished 45° Elbow with Tangents

- Sanitary Polished 45° Elbow with Tangents
- Available in 304 & 316L Stainless Steel

### Accommodate 45° process line turns with permanent butt weld fittings

The Polished 45° Elbow with Tangents from Sanitube™ is available in both 304 & 316L stainless steel alloys. Welds are required at both ends in order to accommodate a 45° change in angle between separate runs of sanitary tubing. Tangents allow additional room while welding in place. Stainless steel material is resistant to corrosion and can withstand high temperatures. This product is manufactured in accordance with 3A Standards for sanitary process line applications including food & beverage industries.

| Size (Tube OD) | Dimensions |  |       |
|----------------|------------|--|-------|
|                | A          |  | R     |
| 1/2"           | 3.000      |  | 1.125 |
| 3/4"           | 3.000      |  | 1.125 |
| 1 "            | 1.188      |  | 1.500 |
| 1-1/2"         | 1.625      |  | 2.250 |
| 2 "            | 2.312      |  | 3.000 |
| 2-1/2"         | 3.000      |  | 3.750 |
| 3 "            | 3.688      |  | 4.500 |
