

Single Pin Heavy Duty Clamp

Tri-Clamp Stainless Steel

Securely connect tri-clamp ends with heavy duty, stainless steel single pin clamp

The single pin heavy duty clamp with a wingnut is made from 304 stainless steel alloy. It is used to join two separate tri-clamp ends to one another. Sizes on this product range from 1/2 inch all the way up to 12 inches in diameter. A tri-clamp rubber gasket should be placed between the two flange ends to ensure proper fit and secure connection. Do not over tighten wing-nut as this may damage product.

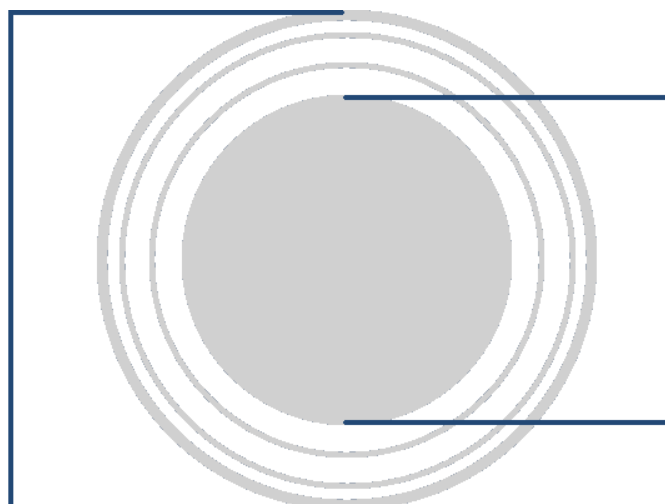

This product should not come in contact with processing media and thus is not offered in 316L alloy option. Clamp connections create a non-permanent join for easy access to clean and inspect line processes.

SINGLE HEAVY DUTY CLAMPS W/ WING NUT PART NUMBERS & DIMENSIONS

Size (Tube OD)	Service Pressure Rating at 70°F	Service Pressu	
1/2" – 3/4"	1,500		1
